

Retro 250 Specification Sheet

The Unipar UP4 Retro-250 comes with a 7 inch diameter specially designed, Patented Cool-Spot™ reflector that will produce a narrow spot beam pattern but does not burn up standard color gels like all other standard narrow spot beam projectors. The unit also comes with your choice of Spot, Medium Flood, or Wide Flood Par 56 Lens. A wide variety of lamps can be used with the Retro 250:

When using a 250 watt lamp the unit will draw approximately 2.1 amps at 120 volts
When using a 150 watt lamp the unit will draw approximately 1.25 amps at 120 volts
When using a 120 watt lamp the unit will draw approximately 1 amps at 120 volts
When using a 100 watt lamp the unit will draw approximately .83 amps at 120 volts
When using a 50 watt lamp the unit will draw approximately .42 amps at 120 volts

The Retro 250 is made of the highest quality High Impact, High Temperature, Flame Retardant, UV stabilized, Thermo-Plastic materials. This makes the unit very light weight, weather resistant, damage resistant, and virtually maintenance free.
